

 **STOP THOSE ROACHES!**

The Sheriff's Clandestine Manual for Preparing Your Hideout

Important:

For best results, we recommend doing all the preparation steps. However, they are not mandatory. If you can't do them all due to time, personal situations, or disabilities, don't worry. Our treatment still works — it may just take a little longer to fully eliminate the colony.

Service includes: A 30 day warranty from the date of treatment

 KITCHEN – Forbidden Territory for Roaches

- Remove **plates, glasses, utensils, and jars.**
- Store open food in the **fridge or airtight bags.**
-  **No uncovered cereal or food!**
- Place removed items on the table and **cover with a sheet** (top-secret mission).
- **Remove trash and paper bags.** No excuses!
- **Vacuum cabinets and corners** — be a crumb detective!
- **Move the fridge and stove** to clean behind them. Roaches hide and lay eggs there!

 BATHROOM – Espionage Zone

- **Empty drawers and cabinets**, even forgotten lotions!
- Store items in **sealed bags** (cosmetic smuggler style).
- Place bags in the **bathtub.**
- **Keep floors spotless!**

 BEDROOM – Watch for Hiding Spots!

- **Empty closets:** remove shoes, boxes, and stuffed animals.
- **Pull out drawers** like you're escaping a raid!
- Place items on the **bed and cover with a sheet.**

🌿 OUTDOORS – No Hiding Allowed!

- Remove **pet food and water bowls**.
- **Mow the lawn** — no jungles allowed!
- **Clear leaves, sticks, and debris** where bugs hide.

✅ MISSION CONCLUSIONS

- **Leave for 4 hours**, including pets.
- **✗ No mopping for 3 days!** Sweep only to preserve treatment.
- **Treatment remains active** on treated surfaces.
- 🐟 **Fish:** protect aquariums and consult the technician about pumps.
- 🍽️ **Clean and store dishes.**
- 🐦🐸 **Relocate birds and reptiles** (no feathered protests!).

Important Note from the Sheriff:

Where Do Cockroaches Die After Treatment?

- Many die inside their nests and hiding spots.
- Others die in cracks, crevices, and wall voids.
- Some die behind or underneath appliances.
- You may not see dead roaches on your floors.
- Not seeing dead roaches doesn't mean the treatment isn't working.

First treatment takes down 50% to 60% of the colony of roaches. So we have to wait for the rest of the roaches to get infected when they are exposed to treatment.

Depending on the infestation maybe you are going to need more treatments.

Warranty Notice

Failure to follow the recommendations and receive follow-up treatment within the technician's recommended time frame voids the 30-day post-service warranty.

Thank you for joining this mission.
Sheriff Pest Control salutes you.
Out with the roaches!
