STOP THE COCKROACHES!

Sheriff's secret manual to prepare your hideout

KITCHEN – Forbidden territory for roaches

Remove dishes, cutlery, jars, and food from cabinets. Store everything in the fridge or sealed bags—no open snacks. Take out the trash and vacuum cabinets and corners.

BATHROOM – Grooming and espionage zone

Clear drawers and cabinets, put items in sealed bags, and leave them in the bathtub. Keep the floor clean.

BEDROOM – Watch out for hiding spots!

Empty closets, shoes, and boxes. Pull out drawers and cover the bed with a sheet if needed.

EXTERIOR – Don't let them hide outside!

Remove pet food and water dishes. Cut grass, sweep leaves, and clear possible bug shelters.

Conclusion – **Leave the house for 4 hours, pets included.**

Do not mop all day and only sweep for 4 days, since the treatment is on the floor and surfaces.

Fish: Covered and pump turned off (stealth aquatic mode).

Clean dishes should be hidden.

Birds and reptiles: Mandatory relocation. We don't want any feathered protests.

Thank you for joining this mission.
Sheriff Pest Control salutes you.
Out with the roaches!
